EXPERIENCE

OTHER EXPERIENCE

Kitchen Staff / Dishwasher

Sumo Niku Japanese Restaurant
December 2025 - January 2026

- Maintained cleanliness and sanitation of kitchen tools, dishes, and workstations in compliance with food safety standards
- Assisted with basic food preparation and cooking during peak hours
- Supported dining operations by coordinating with service staff to ensure smooth customer flow
- Demonstrated teamwork, time management, and reliability in a fast-paced environment
- Adapted quickly to multiple roles as needed by the kitchen and dining team

Student Assistant Scholar - School Clinic

- Conducted basic health assessments including height, weight, BMI, temperature, and oxygen saturation (O₂Sat)
- Accurately encoded and maintained student health records during Annual Physical Examinations (APE)
- Ensured data accuracy, organization, and confidentiality
- Assisted in maintaining efficient clinic operations

AI Chatbot & Workflow Automation Messenger & CRM Integration

- Mastered Prompt Engineering using ChatGPT and Gemini to design structured, context-aware instructions (System Prompts) that ensure AI agents deliver accurate and brand-aligned responses.
- Developed and deployed custom AI chatbots for Messenger using Manychat and respond.io to automate customer inquiries and lead qualification.
- Integrated Large Language Models (LLMs) to handle complex user intents, utilizing advanced prompting techniques to improve the conversational flow of automated systems.
- Utilized GitHub for version control and management of chatbot logic, prompt iterations, and AI configuration files.
- Leveraged Lovable for rapid prototyping and front-end deployment of automation-focused web components and AI-driven interfaces.
- Explored AI video generation using Pixverse AI to create dynamic visual content for automated marketing workflows.
- Optimized business processes by designing automated triggers and branching logic to streamline communication between brands and customers.

TECHNICAL PROJECTS

Grocery Store Point of Sale (POS) System | Capstone Project

- Engineered a comprehensive system to manage real-time inventory tracking and secure transaction processing.
- Designed a user-friendly interface to streamline the checkout process and generate automated sales reports.

Web Development Portfolio | E-commerce & Media

- Developed a full-stack coffee shop website and a dedicated K-pop enthusiast platform using HTML, CSS, and JavaScript.
- Built an interactive movie database website, implementing search functionality and dynamic content rendering.
- Focused on responsive design and intuitive UI/UX to enhance the user experience across different devices.

Project Management System

- Developed a centralized system to track tasks, deadlines, and project milestones, improving organizational efficiency.
- AI, AUTOMATION & DESIGN

AI Integration & Prompt Engineering

- Advanced Prompt Engineering: Mastered the use of structured prompting with Gemini and ChatGPT to build intelligent chatbot logic and automate complex text generation tasks.
- Chatbot Automation: Deployed AI-driven chatbots via Manychat and respond.io, integrating Messenger for automated customer support and lead qualification.
- Workflow Prototyping: Utilized Lovable and GitHub for the rapid development and version control of AI-integrated web components.
- Creative AI: Leveraged Pixverse AI for specialized video generation and visual asset creation.

Process Automation & Digital Media

- Excel Automation: Developed custom VBA macros to automate routine reporting, reducing manual data entry time.
- Digital Design: Created high-quality marketing materials and presentations using Canva.
- Video Production: Executed basic videography and post-production editing using CapCut for social media and project demos.

Certificates

- Book keeping Certification
- Introduction to Programming – Learn Today (Verified)
- Introduction to Visual Studio Code – Skill-Based Certificate
- Getting Started with Web Development – Skill-Based Certificate
